Hickman College Library.

In keeping with the spirit of the age—progress and education—the people of Hickman College, and its corps of assistants, are endeavoring to acquire a library of books where the girls and boys, whose taste is in the direction, can have an opportunity to read and exercise their intellectual abilities. It is the desire of these teachers that the people of Hickman College should stand out as examples of progress to our neighboring towns in spirit with the times and not anaesthetized, that their lives may be filled with inspiring thoughts, and that the trasy literature of the day (which is working so much through the joints of our country) shall have no share for them in contrast with the great minds of the past. We are informed that a number of standard works have been added to the library and that the students are developing a taste for good books—works of history, science, literature, art and practical life. Every child should be taught the importance of reading good books. Too much care cannot be exercised in the selection of the literature for our children.

The world is realizing, says a celebrated writer, that this is the young people's age. They are the electric dynamo of this electrical age, and the school is the power house. Since the school children of today are to be the mothers and fathers and teachers, the lawmakers and administrators of justice, the voters and the officials of our nation a few years hence, let us see that they are given high moral ideals in the school room of today. Let them learn, as they store away the dates and facts of history in their capacious cranial cavities, there has been no great movement in this world's life but has had its intelligent motive, no great leader but has had his high ideal and striven to realize it. Let them be impressed, as they discover the beauties of language and literature, that no productions have come to be of permanent value save those of the man who was reaching for the truth, or striving to portray in others the grandest fact of science, and the beautiful. As they are given the grand fact of science, let them know that they are mastering fragments of the divine truth, and that the world is controlled by the laws of science.

NAPOLEON'S FIRST SUCCESS The First of Arms Under Napoleon's Leadership

A few days after Napoleon Bonaparte entered the camp of the army, he was surrounded by his officers and men. He was in the midst of a great battle, and he was the first to see the enemy's flag. He was the first to see the enemy's flag. He was the first to see the enemy's flag.

In the first subsequent move of the campaign, Napoleon's army was met by the British army. The British army was led by the Duke of Wellington. The British army was met by the French army. The French army was led by Napoleon Bonaparte.

This first successful move of arms made a profound impression on Napoleon's mind and led to the operations which settled his career. His army was still in the field, and he was still in the field. He was still in the field. He was still in the field.

Less than a month after the battle of Austerlitz, Napoleon's army was met by the Russian army. The Russian army was led by the Emperor Alexander I. The Russian army was met by the French army. The French army was led by Napoleon Bonaparte.

What led to the battle of Austerlitz was the fact that Napoleon Bonaparte was the first to see the enemy's flag. He was the first to see the enemy's flag. He was the first to see the enemy's flag.
